

NOTICE OF DETERMINATION OF A DEVELOPMENT APPLICATION

Approval Issued under Section 4.18(1)(a) of the Environmental Planning and Assessment Act 1979

Application No.	DA-15/2021
Applicant	Mr Brett Anthony Parker
Land to be developed	Lot 25 DP 1219541 12 Talbragar Close, INVERELL 2360
Approved development	New Shed
Building Code of Australia Classification	Class 10a
Determination	The determination is consent granted subject to conditions.
Determination date	5 March 2021
Consent is to operate from	5 March 2021
Consent will lapse on	5 March 2026 Unless the work or use to which this consent relates has lawfully commenced on-site in accordance with Section 4.53 of Environmental Planning and Assessment Act 1979.

CONDITIONS OF CONSENT

Preliminary

1. Inverell Shire Council issues its consent, subject to conditions stated hereunder, in accordance with Section 4.17 of the *Environmental Planning and Assessment Act 1979*.

Consent is granted for a non-habitable shed ancillary to the dwelling.

To confirm and clarify the terms of consent, the development must be carried out in accordance with the stamped and approved plans and accompanying documentation, unless modified by any following condition. Any deviation will require the consent of Council.

2. The applicant must comply with all relevant prescribed conditions as contained in Division 8A of the *Environmental Planning & Assessment Regulation 2000* (as detailed at the end of this consent).
3. The shed is to be located entirely outside the 'Easement for Overhead Transmission Line 20 Wide (D.P. 1064042)' affecting Lot 25 DP 1219541.

During Construction

4. To safeguard the local amenity, reduce noise nuisance and to prevent environmental pollution during the construction period:
 - Works on site are to be carried out in accordance with the *Protection of the Environment Operations Act 1997* in relation to noise, dust and associated nuisances from the site. The carrying out of works shall not interfere with the quiet enjoyment of the surrounding neighbourhood;

- Construction may only be carried out between 7.00am and 5.00pm, Monday to Saturday, and no construction is to be carried out at any time on a Sunday or Public Holiday. Council may consent to vary these hours in particular circumstances where it can be demonstrated that it is unavoidable;
- Stockpiles of topsoil, sand, aggregate, spoil or other material shall be stored clear of any drainage path of easement, natural watercourse, footpath, kerb or road surface and shall implement measures to prevent the movement of such material off site;
- Building operations such as brick cutting, washing tools, concreting and bricklaying shall be undertaken on the building block. The pollutants from these building operations shall be contained on site;
- Builders waste must not be burnt or buried on site. All waste (including felled trees) must be contained and removed to a waste disposal depot;
- Sediment and erosion control measures are to be implemented onsite and maintained until the site is fully stabilised, in accordance with Council's Erosion and Sedimentation Control Policy 2004; and
- Where the proposed development involves the disturbance of any existing survey monuments, those monuments affected will need to be relocated by a registered surveyor under the *Surveying and Spatial Information Act 2002*. A plan showing the relocated monuments will then be required to be lodged as a matter of public record at the Lands Titles Office.

Prior to Occupation

5. Prior to occupation of the premises, an Occupation Certificate must be issued in accordance with Section 109M of the *Environmental Planning and Assessment Act 1979*.

Note: Prior to issue of the Occupation Certificate, the Principal Certifying Authority is required to be satisfied, amongst other things, that:

- all required inspections (including each applicable mandatory critical stage inspection) have been carried out; and
 - any preconditions to the issue of the certificate required by a development consent have been met.
6. Prior to issue of an Occupation Certificate, where applicable, the following works are to be completed:
- All adjacent public and private land must be cleared of obstructions such as stockpiles of topsoil, building material, waste and other material associated with construction.
 - The applicant will repair/restore, or pay the full costs associated with repairing/restoring, any footpath, public reserve and infrastructure that is damaged by the development.
 - Any unused layback in the kerb and gutter is to be capped to Council's satisfaction.
 - Sediment and erosion control measures, which are no longer required, are to be removed including any silt/sediment in gutters and/or drains.
7. Prior to issue of an Occupation Certificate, all stormwater (i.e. roof water and/or surface water) shall be drained in accordance with *Australian Standard 3500.3 Plumbing and drainage*.

Advice Only

Prior to carrying out any works, a "Dial Before You Dig" enquiry should be undertaken in accordance with the requirements of Part 5E (Protection of Underground Electricity Power Lines) of the Electricity Supply Act 1995 (NSW). Given there is electricity infrastructure in the area, it is the responsibility of the person/s completing any works around powerlines to understand their safety responsibilities. SafeWork NSW (www.safework.nsw.gov.au) has publications that provide guidance when working close to electricity infrastructure. These include the Code of Practice – Work near Overhead Power Lines and Code of Practice – Work near Underground Assets.

REASONS FOR CONDITIONS

The above conditions have been imposed:

1. To ensure compliance with the terms of the applicable environmental planning instruments.
2. Having regard to Council's duties of consideration under Section 4.15 of the *Environmental Planning and Assessment Act 1979*, as well as Section 4.17 which authorizes the imposing of the consent conditions.
3. Having regard to the circumstances of the case and the public interest.

REASONS FOR APPROVAL

1. The development, subject to conditions, is consistent with the objectives of the R5 Large Lot Residential zone.
2. The shed is ancillary to the dwelling and is consistent with the development in the locality.
3. DA-15/2021 was referred to Essential Energy in accordance with Clause 45 of State Environmental Planning Policy (Infrastructure) 2007. No issues were identified which preclude issuing of development consent.

COMMUNITY CONSULTATION

As per the Inverell Community Participation Plan the development was considered to be a minor development with minimal environmental impact and notification was not necessary.

RIGHT OF APPEAL

If you are dissatisfied with this decision, Division 8.3 of the *Environmental Planning and Assessment Act 1979* gives you the right to appeal to the Land and Environment Court within 6 months after the date on which you receive this notice. You are also advised that Division 8.2 of the *Environmental Planning and Assessment Act 1979* provides that you may apply to Council for a review of this decision subject to the limitations contained in that section and payment of the prescribed fee.

On behalf of Inverell Shire Council

CHRIS FALEY
DEVELOPMENT SERVICES COORDINATOR
