

NOTICE OF DETERMINATION OF A DEVELOPMENT APPLICATION

Approval Issued under Section 4.18(1)(a) of the Environmental Planning and Assessment Act 1979

Application No.	DA-51/2021
Applicant	McMahon Structural
Land to be developed	Lot 14 DP 1250927 66 Bimbadeen Drive, INVERELL 2360
Approved development	New Dwelling, Shed and Pool
Building Code of Australia Classification	Class 1a Class 10a Class 10b
Determination	The determination is consent granted subject to conditions.
Determination date	14 May 2021
Consent is to operate from	14 May 2021
Consent will lapse on	14 May 2026 Unless the work or use to which this consent relates has lawfully commenced on-site in accordance with Section 4.53 of Environmental Planning and Assessment Act 1979.

CONDITIONS OF CONSENT

Preliminary

1. Inverell Shire Council issues its consent, subject to conditions stated hereunder, in accordance with Section 4.17 of the *Environmental Planning and Assessment Act 1979*.

Consent is granted for:

- A New Dwelling, Shed and Pool; and
- Removal of 1 White Box Tree Species 1 metre from proposed driveway.

To confirm and clarify the terms of consent, the development must be carried out in accordance with the stamped and approved plans and accompanying documentation, unless modified by any following condition. Any deviation will require the consent of Council.

2. The applicant must comply with all relevant prescribed conditions as contained in Division 8A of the *Environmental Planning & Assessment Regulation 2000*.

Prior to Construction

3. Prior to the commencement of any works (including earthworks) on the site a Construction Certificate must be issued in accordance with the *Environmental Planning and Assessment Act 1979*. The application for a Construction Certificate shall include plans and specifications demonstrating full compliance.

During Construction

4. Prior to commencement of works (including earthworks), run-off and erosion control measures must be implemented (in accordance with Council's Erosion and Sedimentation Control Policy 2005) to prevent soil erosion, water pollution and the discharge of loose sediment on the surrounding land. Measures are to include:
 - Diverting uncontaminated run-off around cleared or disturbed areas;
 - Erecting a silt fence and providing any other necessary sediment control measures that will prevent debris escaping into drainage systems, waterways or adjoining properties;
 - Preventing the tracking of sediment by vehicles onto roads; and
 - Stockpiling top soil, excavated materials, construction and landscaping supplies and debris within the lot.

Run-off and erosion control measures must be in place for the duration of building work and until adequate (more than 70%) vegetation (grass) cover is established on the site to prevent debris escaping from the site into drainage systems, waterways, adjoining properties and roads. In the event that the building contract is completed, it is the responsibility of the owner to maintain the run-off and erosion control measures.

5. To safeguard the local amenity, reduce noise nuisance and to prevent environmental pollution during the construction period:
 - Works on site are to be carried out in accordance with the *Protection of the Environment Operations Act 1997* in relation to noise, dust and associated nuisances from the site. The carrying out of works shall not interfere with the quiet enjoyment of the surrounding neighbourhood;
 - Construction may only be carried out between 7.00am and 5.00pm, Monday to Saturday, and no construction is to be carried out at any time on a Sunday or Public Holiday. Council may consent to vary these hours in particular circumstances where it can be demonstrated that it is unavoidable;
 - Stockpiles of topsoil, sand, aggregate, spoil or other material shall be stored clear of any drainage path of easement, natural watercourse, footpath, kerb or road surface and shall implement measures to prevent the movement of such material off site;
 - Building operations such as brick cutting, washing tools, concreting and bricklaying shall be undertaken on the building block. The pollutants from these building operations shall be contained on site;
 - Builders waste must not be burnt or buried on site. All waste (including felled trees) must be contained and removed to a waste disposal depot; and
 - Where the proposed development involves the disturbance of any existing survey monuments, those monuments affected will need to be relocated by a registered surveyor under the *Surveying and Spatial Information Act 2002*. A plan showing the relocated monuments will then be required to be lodged as a matter of public record at the Lands Titles Office.

Prior to Occupation

6. Prior to occupation of the dwelling and/ore shed, an Occupation Certificate must be issued for each building in accordance with the *Environmental Planning and Assessment Act 1979*.

Note: Prior to issue of the Occupation Certificate, the Principal Certifying Authority is required to be satisfied, amongst other things, that:

- *all required inspections (including each applicable mandatory critical stage inspection) have been carried out; and*
 - *any preconditions to the issue of the certificate required by a development consent have been met.*
7. Prior to issue of an Occupation Certificate, all stormwater (i.e. roof water and/or surface water) shall be drained in accordance with *Australian Standard 3500.3 Plumbing and drainage*.

8. To comply with the *Swimming Pools Act 1992* the owner of the premises on which a swimming pool is situated must ensure that the swimming pool is at all times surrounded by a child-resistant barrier:
 - that separates the swimming pool from any residential building situated on the premises and from any place (whether public or private) adjoining the premises; and that is designed, constructed, installed and maintained in accordance with the regulations and *Australian Standard 1926-2007 Swimming pool safety*
9. The swimming pool filtration equipment is to be located so as to prevent the possibility of any offensive noise to adjoining or nearby residences.
10. Any external pool lighting shall be positioned and shielded to prevent a glare nuisance to neighbouring premises.
11. A resuscitation techniques flow sequence sign/poster is to be displayed in a prominent position adjacent to the pool. The sequence must be in accordance with the Cardiopulmonary Resuscitation Guideline, illustrated by drawings with key words only in bold print, and contain a statement to the effect that formal instruction in resuscitation is also essential. The sign shall comply with the other relevant guidelines of the Australian Resuscitation Council and include the name of the teaching organisation or other body that published the sign and the date of its publication.

Advice Only

12. As part of the construction of a dwelling, outbuildings and/or other development it is the responsibility of the property owners to manage stormwater drainage through the installation of contours, retaining walls, pits and pipes and the like to reduce potential stormwater nuisances, in manner which does detrimentally impact downstream properties. Council is unlikely to take any future action in relation surface water runoff that is caused by extreme rainfall events or that is deemed to be natural runoff from higher properties due to natural topography.

REASONS FOR CONDITIONS

The above conditions have been imposed:

1. To ensure compliance with the terms of the applicable environmental planning instruments.
2. Having regard to Council's duties of consideration under Section 4.15 of the *Environmental Planning and Assessment Act 1979*, as well as Section 4.17 which authorizes the imposing of the consent conditions.
3. Having regard to the circumstances of the case and the public interest.

REASONS FOR APPROVAL

1. The development, subject to conditions, is consistent with the objectives of the R5 Large Lot Residential zone.
2. The built form and design of the new dwelling, shed and pool, subject to conditions is consistent with the streetscape and development in the locality.
3. In consideration of residential controls of the Inverell Development Control Plan 2013, the development is considered appropriate within the neighbourhood.

COMMUNITY CONSULTATION

As per the Inverell Community Participation Plan the development was considered to be a minor development with minimal environmental impact and notification was not necessary.

RIGHT OF APPEAL

If you are dissatisfied with this decision, Division 8.3 of the *Environmental Planning and Assessment Act 1979* gives you the right to appeal to the Land and Environment Court within 6 months after the date on which you receive this notice. You are also advised that Division 8.2 of the *Environmental Planning and Assessment Act 1979* provides that you may apply to Council for a review of this decision subject to the limitations contained in that section and payment of the prescribed fee.

On behalf of Inverell Shire Council

CHRIS FALEY
DEVELOPMENT SERVICES COORDINATOR
