

NOTICE OF DETERMINATION OF A DEVELOPMENT APPLICATION

Approval Issued under Section 4.18(1)(a) of the Environmental Planning and Assessment Act 1979

DA-39/2022
Ms Eriko Kawaramoto
Lot 1 DP 1070932
227 Swanbrook Road, INVERELL NSW 2360
Demolition of a failing structure - existing wet area wing attached to the existing single storey dwelling.
Construction of a new library/wc in the near by location which will be attached to the existing single storey dwelling.
Removal of existing FC cladding on North wind addition (circa 1970), and replace with new weatherboard
Removal of existing aluminium windows on North Wing addition (Circa 1970) and replace with new timber windows
Reconstruct rotting timber deck with new hardwood deck on North
Class 1a
The determination is consent granted subject to conditions.
12 April 2022
12 April 2022
12 April 2027
Unless the work or use to which this consent relates has lawfully commenced on-site in accordance with Section 4.53 of Environmental Planning and Assessment Act 1979.

CONDITIONS OF CONSENT

Preliminary

Inverell Shire Council issues its consent, subject to conditions stated hereunder, in accordance with Section 4.17 of the Environmental Planning and Assessment Act 1979.

Consent is granted for:

- Demolition of a failing structure existing wet area wing attached to the existing single storey dwelling;
- Construction of a new library/wc in the near by location which will be attached to the existing single storey dwelling;
- Removal of existing FC cladding on North wind addition (circa 1970), and replace with new weatherboard;
- Removal of existing aluminium windows on North Wing addition (Circa 1970) and replace with new timber windows; and

Reconstruct rotting timber deck with new hardwood deck on North

To confirm and clarify the terms of consent, the development must be carried out in accordance with the stamped and approved plans and accompanying documentation, unless modified by any following condition. Any deviation will require the consent of Council.

2. The applicant must comply with all relevant prescribed conditions as contained in Division 8A of the *Environmental Planning & Assessment Regulation 2000*.

Prior to Construction

3. Prior to the commencement of any works (including earthworks) on the site a Construction Certificate must be issued in accordance with the *Environmental Planning and Assessment Act* 1979. The application for a Construction Certificate shall include plans and specifications demonstrating full compliance.

During Construction

- 4. To safeguard the local amenity, reduce noise nuisance and to prevent environmental pollution during the construction period:
 - Works on site are to be carried out in accordance with the Protection of the Environment Operations Act 1997 in relation to noise, dust and associated nuisances from the site. The carrying out of works shall not interfere with the quiet enjoyment of the surrounding neighbourhood;
 - Construction may only be carried out between 7.00am and 5.00pm, Monday to Saturday, and no construction is to be carried out at any time on a Sunday or Public Holiday. Council may consent to vary these hours in particular circumstances where it can be demonstrated that it is unavoidable;
 - Stockpiles of topsoil, sand, aggregate, spoil or other material shall be stored clear of any drainage path of easement, natural watercourse, footpath, kerb or road surface and shall implement measures to prevent the movement of such material off site;
 - Building operations such as brick cutting, washing tools, concreting and bricklaying shall be undertaken on the building block. The pollutants from these building operations shall be contained on site;
 - Builders waste must not be burnt or buried on site. All waste (including felled trees)
 must be contained and removed to a waste disposal depot; and
 - Where the proposed development involves the disturbance of any existing survey
 monuments, those monuments affected will need to be relocated by a registered
 surveyor under the Surveying and Spatial Information Act 2002. A plan showing the
 relocated monuments will then be required to be lodged as a matter of public record at
 the Lands Titles Office.
- 5. Prior to commencement of works (including earthworks), run-off and erosion control measures must be implemented in accordance with Council's Erosion and Sedimentation Control Policy 2005) to prevent soil erosion, water pollution and the discharge of loose sediment on the surrounding land. Measures are to include:
 - Diverting uncontaminated run-off around cleared or disturbed areas;
 - Erecting a silt fence and providing any other necessary sediment control measures that will prevent debris escaping into drainage systems, waterways or adjoining properties;
 - Preventing the tracking of sediment by vehicles onto roads; and
 - Stockpiling top soil, excavated materials, construction and landscaping supplies and debris within the lot.

Run-off and erosion control measures must be in place for the duration of building work and until adequate cover is established on the site.

6. Significant building elements, fixtures, fittings and fragile materials must be adequately protected during construction. Protection systems must ensure historic fabric is not damaged or removed.

Prior to Occupation

7. Prior to occupation of the dwelling and/or shed, an Occupation Certificate must be issued for each building in accordance with the *Environmental Planning and Assessment Act 1979*.

Note: Prior to issue of the Occupation Certificate, the Principal Certifying Authority is required to be satisfied, amongst other things, that:

- all required inspections (including each applicable mandatory critical stage inspection) have been carried out; and
- any preconditions to the issue of the certificate required by a development consent have been met.
- 8. Prior to issue of an Occupation Certificate, all stormwater (i.e. roof water and/or surface water) shall be drained in accordance with *Australian Standard 3500.3 Plumbing and drainage*.

Advice Only

It should be noted that, since all new windows will be timber, all original timber windows, doors and internal weatherboards that are to be removed should be retained and reused in the building where possible or elsewhere on the site.

REASONS FOR CONDITIONS

The above conditions have been imposed:

- To ensure compliance with the terms of the applicable environmental planning instruments.
- 2. Having regard to Council's duties of consideration under Section 4.15 of the *Environmental Planning and Assessment Act 1979*, as well as Section 4.17 which authorizes the imposing of the consent conditions.
- 3. Having regard to the circumstances of the case and the public interest.

REASONS FOR APPROVAL

- 1. The development, subject to conditions, is consistent with the objectives of the R5 Large Lot Residential zone.
- 2. The built form and design of the alterations and additions, subject to conditions is consistent with the streetscape and development in the locality.
- 3. In consideration of residential controls of the Inverell Development Control Plan 2013, the development is considered appropriate within the neighbourhood.
- 4. The development is not considered to significantly impact the significance of the Heritage Item.

COMMUNITY CONSULTATION

As per the Inverell Community Participation Plan the development was considered to be a minor development with minimal environmental impact and notification was not necessary.

RIGHT OF APPEAL

If you are dissatisfied with this decision, Division 8.3 of the *Environmental Planning and Assessment Act 1979* gives you the right to appeal to the Land and Environment Court within 6 months after the date on which you receive this notice. You are also advised that Division 8.2 of the *Environmental Planning and Assessment Act 1979* provides that you may apply to Council for a review of this decision subject to the limitations contained in that section and payment of the prescribed fee.

On behalf of Inverell Shire Council

CHRIS FALEY
